Art Unit: 3724

1. Claims 8-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 07 Nov 05.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sandy '863, who shows a hair trimmer with all of the recited limitations including a moveable blade (26) with long teeth (33) and a stationary blade (25) with short teeth (28).

A cutting zone is formed where the moveable long teeth and stationary short teeth meet. The long teeth guide the hair into the cutting zone and laterally retain them there.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

5. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sandy, who shows a hair trimmer with most of the recited limitations except the stationary blade is not undercut.

However, it is quite common for trimmers to have undercuts on the blades for the purpose of better retaining the object that needs to be cut. Some examples of this are the patents to Wright '470 (has parallel portion for claim 5) and the Japanese patent to Yanagisawa (JP352046969 – has reverse scissors action for claims 6 and 7).

Additional examples can be provided.

It would have been obvious to one of ordinary skill in the art to have modified Sandy by providing an undercut on the stationary blade, as is suggested by at least Wright and Yanagisawa, in order to better retain the hair to be cut.

6. Made of record but not relied on are numerous patents showing pertinent trimmers.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson whose telephone number is 571-272-4512. The examiner can normally be reached Mon-Thurs, 7:30AM-5PM
